- 1.5 Billion bottles recycled in 2012
- Material is recycled from over 40 states plus Canada
- Will produce over 100 Million lbs. polyester and non-polyester materials for resale/reuse in 2013

SEN. ISAKSON VISITS GROWING MOHAWK FACILITY IN SUMMERVILLE

Mohawk Industries was honored to host Georgia Senator Johnny Isakson at the Company's expanding facility in Summerville, Georgia on August 9.

The facility is among the largest recyclers of plastic bottles in the world, transforming more than 1.5 billion bottles per year into first quality fiber for Mohawk's popular EverStrand carpet line.

"We were pleased to update Senator Isakson on the growth of our facility," said Chris Craig, manufacturing director at Mohawk's Summerville site. "We are increasing our capacity to meet the growing demand for our products, and when the expansion is complete we'll create about **500 new jobs**, which is a major boost to the local economy."

During his visit, Senator Isakson noted, "The business of America is good business. Companies like Mohawk continue to provide quality jobs to quality people, and this expansion is a step in the right direction to get our economy growing again
