Novelis Introduces evercycle™ for Cosmetics with 100% Recycled Aluminum

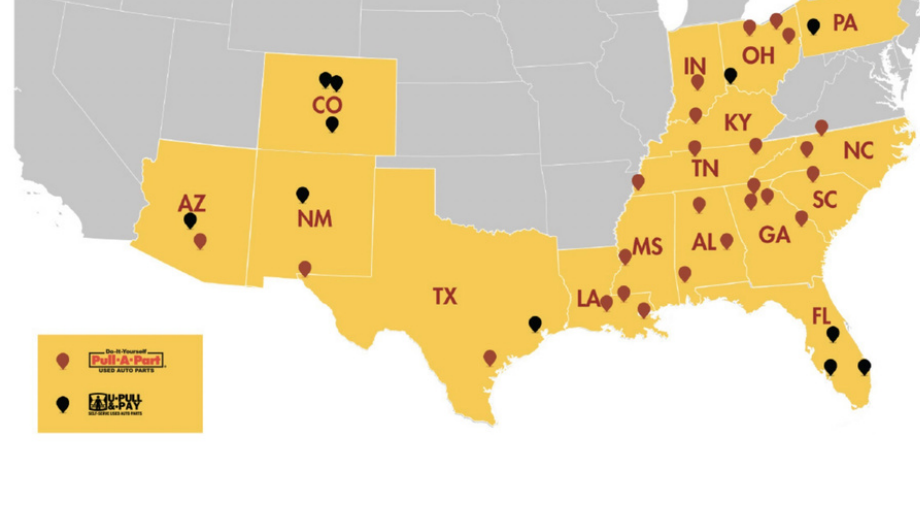

Novelis, a leading sustainable aluminum solutions provider and the world leader in aluminum rolling and recycling, recently announced it is expanding its evercycle™ portfolio to the cosmetic packaging market. evercycle Cosmetics is certified to contain 100% recycled aluminum and can achieve customers' anodized quality requirements. The new alloy offers packaging customers in the beauty, skincare and wellness space an infinitely recyclable solution compared to plastic alternatives. "With increasing consumer desire for more sustainable products, Novelis is proud to offer our customers a new packaging solution that is not only made from 100% recycled aluminum but one that can also be easily recycled again," said Jami Chime, Account Manager, Specialty Products, Novelis North America.

Product certified to contain 100% recycled content.

Pull-A-Part Expands

In late August, **Pull-A-Part**, an industry-leading automotive recycler, and operator of 25 do-it-yourself (DIY) used auto parts retail stores and salvage yards, announced it has acquired U-Pull-&Pay (UPAP), a wholly-owned subsidiary of **The David J. Joseph Company** (DJJ) and part of the Nucor family of steel and steel products companies.

This is the largest acquisition in Pull-A-Part's history and an acknowledgement of the company's commitment to growth and expansion in the U.S. Through this acquisition,

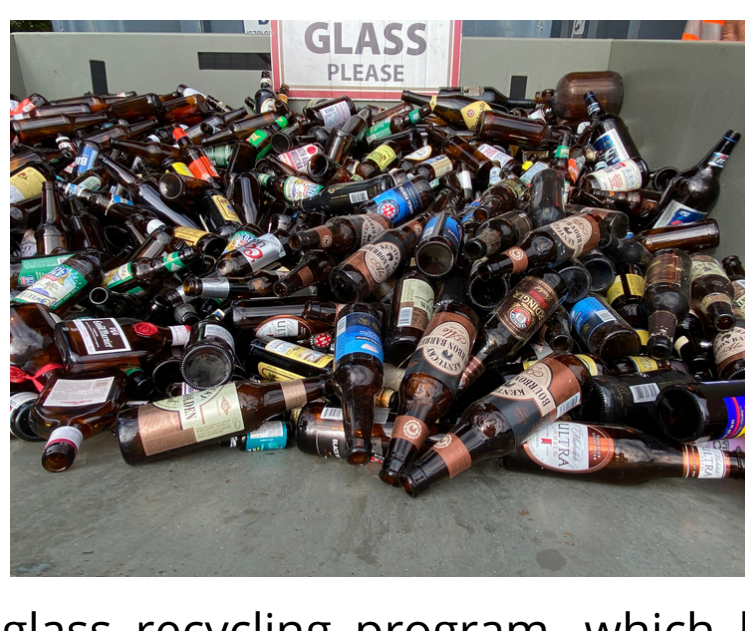

Pull-A-Part will add 11 locations in the U.S., including its first locations in Colorado, Florida, New Mexico, and Pennsylvania. Pull-A-Part will now operate 36 locations in 16 states nationwide.

Pull-A-Part is an industry leading automotive recycler and do-it-yourself (DIY) used auto parts retailer headquartered in Atlanta, Georgia. Pull-A-Part opened its first stores in 1997 and today operates 25 self-service used auto parts retail locations and automotive recycling facilities in 12 states nationwide. Pull-A-Part purchases end-of-life vehicles (ELVs) from consumers and other sources which become inventory for its self-service used auto parts stores and ultimately raw materials the company processes for recycling at its facilities.

Georgia Spotlights

Several Georgia Programs Focus on Recycling Glass

Roswell will be applying to **The Glass Recycling Foundation**, a 501(c)(3) non-profit organization, for a grant to purchase glass recycling trailers. The grant program is intended to increase glass recovery, diversion from landfills and to connect glass generators with end-markets. [Learn more](#) about their plans and application.

Gwinnett County is teaming up with **Waste Management** to expand the county's glass recycling program to E.E. Robinson Park. The program supports residents' requests to recycle glass. This is the third drop-off glass recycling location offered through the

glass recycling program, which has already diverted 102 tons of mixed glass from landfills at existing sites at OneStop Norcross and Pinckneyville Park in Peachtree Corners. [Learn more](#) about their expansion.

Alpharetta residents have a new option for recycling glass since mid September when the City of Alpharetta opened a new drop-off center. The center is located in the parking lot of the Alpharetta Department of Public Works located at 1790 Hembree Road. Glass left at the new drop-off site will be transported to the Strategic Materials recycling plant located in College Park. The facility recycles most types of glass and sells their product to Georgia companies that manufacture consumer products like fiberglass insulation and flooring. The site will be available to Alpharetta residents 24 hours a day, 7 days a week. While it is an unstaffed facility, security cameras and license plate readers on site will enable the City to identify those who improperly dispose of items.

Upcoming Events

November 9-10, 2022

SERDC Annual Meeting

Atlanta, GA

[Learn more information and register.](#)

November 14-16, 2022

SWANA GA Chapter Fall Meeting

Sea Palms-St Simons Island, GA
