Interface®

“For those who think business exists to make a profit, I suggest they think again. Business makes a profit to exist. Surely it must exist for some higher, nobler purpose than that.”

-Ray C. Anderson

HOW REENTRY *works*

RECYCLING –

We want to close the loop and recycle old product into new.

- Screening for chemical contaminants
- Shredding and separation
- Grinding
- Mixing recycled material with other backing ingredients
- Manufacturing

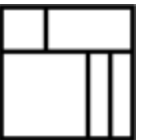

REUSE –

Lots of spaces need high quality flooring and don't need it to be new. Let us find find your flooring a new home.

Tip: Look for local partners in your area with resources like the [All for Reuse Ecosystem Map](#)

RECOVER –

If the material isn't ready to live another life on the floor, and we can't close the loop, we'll send it to a waste to energy partner.

Circularity Through Partnership

How Turner Construction, Page Architects, and Interface saved acres of flooring from the landfill.

The Story of 146,870 Pounds of Carpet Tile

Key Workflow and Decision Points:

- Initiating the Process
- Coordinating Logistics
- Integrating to Re Entry
- Celebrating the Win

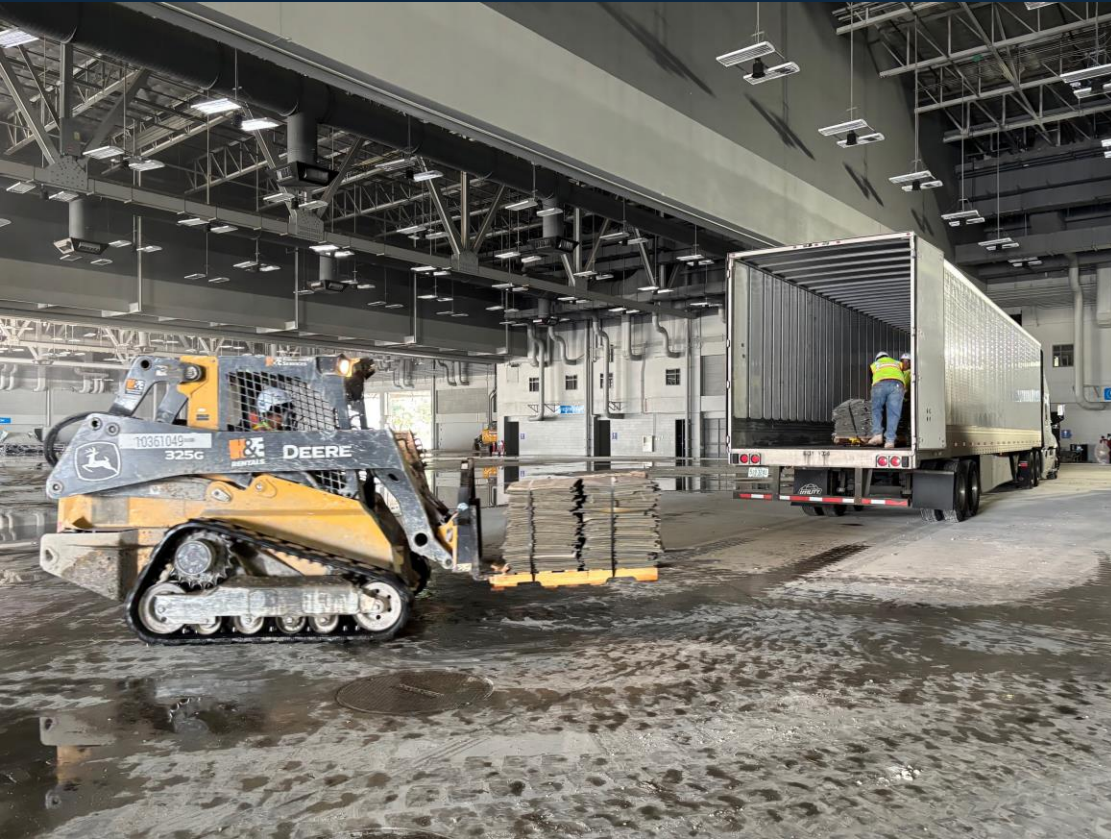

Staging and Palletizing Material

This is the posterchild for reclamation photos, but not everything was this straightforward

- Communication, communication, communication.

Transportation & Logistics

Onsite teams are critical coordinators.

- Local reps can identify product, provide guidance to labor, and document the process.
- Turner was invaluable as an overseer for the material takeback

Transportation & Logistics

Material is delivered to LaGrange, GA.

- Each pallet is weighed on site

Processing

Kyle 3 facility

- Material is inspected and placed on shredder

Processing

Kyle 3 facility

- Whole carpet tile is ground into small particles

Processing

Kyle 3 facility

- Pelletizing

We'd like to thank

Austin Convention Center

for its participation in Interface's 3rd Party certified ReEntry Program.
Your stewardship diverted

146870 Pounds

of Carpet Tile from the landfill for recycling into CQuestGB Carpet Tile.

The amount of flooring reclaimed is equivalent, in weight, to:

4552970 aluminum cans

587 refrigerators

waste generated by 82
Americans for one year

16 garbage trucks
full of carpet

Certificate Number 7172025
Issued 7/17/2025

Carbon Negative by 2040

2023 Introduced our first Carbon Negative product

Replaced virgin materials to more bio based materials in our backing

More recycled content in our products

Interface®

Thank You
