

At Your Door Special Collection

A customized, turnkey solution for your community

The missing link of your recycling program

August 2014

THINK GREEN.®

Trends

Regulatory Environment Increasing

- “Municipalities should try to partner with the solid waste disposal services in their communities for help with public education.”
- US EPA on special waste

Community Environmental Awareness

- Residents are increasingly concerned of how to dispose of Household Generated Special Materials due to environmental & community health implications

Implications

Residents look to community leaders for unique recycling and proper disposal solutions.

Without a proper disposal method, residents may illegally dump or dispose of these materials and possibly pollute their environment.

- Illegally discarded chemicals can cause groundwater and soil pollution
- 1 quart of motor oil that seeps into groundwater can pollute 250,000 gallons of water -National Resource Council

Residents are at risk from improper storage of special materials in the home.

Possibilities

- Do nothing
 - Take the environmental, financial, and community health risks associated with illegal dumping and improper disposal
- Utilize HHW drop off facilities
- Work with an experienced leader in the proper handling of Home Generated Special Materials

Waste Management Provides a Total Solution

Experience & Specialization

- Reputable, safe, well established, with first class references.

Program Options

- Customized program solutions to meet your needs

Extensive Reporting Capabilities

- Comprehensive monthly snapshot of special waste diversion activities to help meet reporting requirements

Diversion & Recycling

- The missing piece of your recycling program

Environmental Protection

- Valuable community program for the greater good
- Unique recycling program to increase community's environmental profile

Value of a Total Solution

- An essential community service for a great value

1. Includes when the program was under different ownership.

Simple & Convenient

Turnkey program that is easy for residents & local government staff

Waste Management will manage all aspects of the At Your Door program:

- Customer Service
- Implementation
- Collection
- Reporting capabilities to local government
- Public education (may be shared based on available communication channels)

Experience & Specialization

Safe & environmentally responsible collection of home generated special materials is our main focus

- Experience is key to keeping your community safe
- The first program of its kind, At Your Door program has FOCUSED on management of home generated special materials collected directly from homes
- Program has served hundreds of thousands of homes since 1995¹ and currently manages programs for dozens of municipalities in many states
- Competition doesn't have the same experience or safety standards

Extensive Reporting Capabilities

Tracking diversion & recycling rates

- Proprietary AYDNet gathers info on materials collected to provide comprehensive diversion reports.
- Designed to assist with community reporting requirements
- Continually improving service through feedback survey cards & consolidated reporting
